Goy, Flower is now filrting with Cleveand in the hope of securing his support at Ch cago should the ex-President fail to get the nomination. If Flower keeps up this sort of thing Boss Hill will assume a closer supervision of the Executive Department at Albany than ever.

Ground has been broken for the new lin plate factory in New Jersey. It will cover three acres of land and will have a capacity of 5,000 boxes a week. Perhaps the Boston Herald can make the people of Elizabethport believe that it is better to buy our tin plate abroad than to manufacture it in this country.

The editors of the esteemed Boston Past and Herald do not agree in their conclusions concerning the Boston Democratic The former was pleased over the alleged fact that the caucuses bassed off "in such good shape." The latter remarks, however, that "the row that took place in Ward II was obviously due to the wish of one or two well known persons to disgust decent men by their rictous and lilegal proceedings." Our contemporaries should try and get to-

It is stated that when Mahoga the provision in the Sundry Civil bill received every etc. relating to the recoinage of muti ated and debased silver currency is reached, he will offer an amendment in the shape of his free coluage bill. The claim is made The Parable of Two Wives. that such an amendment cannot be ruled out on a point of order, and the effect of this move will be to bring the silver question before the House in such a way that

Now that the liver and Harbor bill with his little appropriation attached has The Connecticut Mutual Life Ins. Co. passed the House, Mr. Holman is once more on deck with the demand for retrenchment in expenditures, His first move is to strike from the Sundry Civil 21 Main Street, bill the appropriation for the purchase of a site and the commencement of a building for a new mint at Philadelphia. Mr. Breckit ridge, of Kentucky, favored relaining the clause in the bill. He believed that Congress was spending too much money, but he thought it would have been well if the speeches in support of economy had been made before the 51-2 per cent. Interest Semipassage of the River and Harbor bill. This was a keen thrust at Mr. Ho'man.

Representative Catchings, of Mississippi House has passed a single appropriation against which the charge of extravagance can be justly made. He also says that the crit cism of the River and Hurbor billdoes not worry him in the least. The criticism is not aimed so much at the bill itself as at the Democratic party. Every about the alleged extravagance of the Republicans in the last House, charging them with squandering the money of the people, but now it appears that these sam larger appropriations made by this House It is the contemptible hypocrisy of the

When Congressman Abdrew and other New England Mugwumps appear d befor the majority of the Ways and Meaus Committee he favor of free iron, they were met by a most annising excuse for not reporting such a bill. Mr. Cockran, the Tammany member, innoceptly remarked that he would favor such a bill if he could have some assurance that the Republican Senators would pass it. Eager for some excuse, no matter now absurd, the other members of the committee at one grasped the idea suggested and all declared that this was the only thing that prevented them from immediately reporting the bill. The absorbity of this position will be seen at once. These same gentlemen did not thing it necessary to secure any assurances from the Senate before reporting the free wool bill, or the free binding twine bill, which was rushed through the House under a suspension of the rules. The reason for not reporting a free iron bill is just the same now as it was when such a schedule was stricken from the Mills bill, namely, Democratic opposition. This House is willing to destroy the wool industry, but when it comes to an attack upon at industry that infinential Democrats are largely interested in, tariff reform has no attractions. It is always the same with the Democratic party-hypocrisy is stamped on its every action.

praiseworthy work in exposing the frauds perpetrated in taking the recent New York State census. It charges—and presents the proof to support its positionthat wholesale alterations were made in the original enumeration returns, that thousands of aliens were returned as citizens so as to increase the number of State Senators and Assemblymen apportioned to Democratic strongholds, and that forced verifications were made in many counties. One specification is that an artrary addition of 26,530 was made to the population of Brooklyn. The alleged census of New York was one of the points. for which the Democrata played when under the direction of Hill they stole the Legislature. They desired to perrymander the state in such a way as to maure Democratic control indefinite y. They could not carry out their seisme fully without increasing the population of the ottes largely and decreasing the population of the ottes largely and decreasing the population of Lie vari. districts. This is exactly what he from the first however the have a part decrease to be for meanily never to be a made to be a second to be a

We again call the attention of the Republicans to the importance of looking fter the selection of the ballot blerks in the various towns. These clerks must all be selected this month and the time is getting short. Unless the Republicans recommend the men they want the Selectwill have to fill the positions and if the Board of Selectmen is Democratic, in case the Republicans fail to act, the Democrats will thus have the choice of clerks to represent both parties. As the new appo tionment has lisarranged the class dis-tricts, more or less, this work must be looked after by the members of the County Committee. Steps should be taken at once to see that each town is ready to make the necessary recommendations to and should be filled with good men.

N., to be completely to the country did not think much about, it was the House of Representatives. (Laughter.) That could be seen the hands they have put it in. The argument in favor of the reduction was brute force. The Bemocrats had three to the Republicans one. That was the only reason for the reduction. He hoped the gentleman from Indiana (Mr. Holman) would give something which, for decency's sake, looked like an explanation of the reduction.

NEARLY A SERIOUS ACCIDENT.

Washington, May 19. Secretary Blalue attended the garden fete given at Holmead this afternoon and came near having a serious accident, while approaching the pavillon, in which the greater number of guests had gathered. He stopped on a barrow board walk running along the drive way, to greet some friends. Among the young ladies was Miss elter, who, selecting a lovely red rose l'ud from a cluster at her belt, fastened ii to the lapel of his cost.

Mr. McPherson asked Mr. Hale (in charge of the bill) whether \$50,000 would be sufficient.

"No," said Mr. Hale, "but the Scretary of the Navy thought that would cover all he needed for the present. Next winter, of course, there will be more useded."

The amendment was agreed to.

This brought the bill to the point where an "increase in the navy" is provided for. As the subject would necessarily lead to debate, Mr. Hale thought it a good point at which to halt; and then proceeded to offer a lot of less important amendments to preceding portions of the bill. Millons of dollars are lost each year from the inability of the planters to harvest it. Col. A. L. Ellis of Austin, Texas, a few years since had 2000 acres of cotton, white as a snowbank with its fibrous burden, ploughed under, unable to hire labor to eave cotton which if in the bale would have brought \$50,000. The vexations experiences of the cotton planters in the picking season are innumerable.

perfences of the cotton planters in the picking season are innumerable. Monday is spent hustling around the nearest town b.r.og some influential uncle or aunty to assist in secturing commence work or Tuesday, and barring rain, a show, a strike for higher wages, a holiday, a wedding, a dance, a cake walk, a tuneral or some other cuterlainment, he keeps them at work until Friday night, when the team must be furnished to haul them back to town, for the combined wealth of Gould and Vanderbilt would seareely temp the average dusky cotton picker to work on Saturday.

It is little woulder that the Southern,

Saturday.

It is little wonder that the Southern planter who has seen it at work should hall with enthusiasm the advent of the successful Cotton Picker, which he has drained of and classed with the flying machine as something beyond the ingenuity of this generation, and which no evidence would convince that it existed except the sight of it practically picking cotton in the field. The machine is the invention of Angus ampbell, born in Hamilton, Cutario now

Campbell, born in Hamilton, Cutario, now a resident of Waco, Texas. He conceived the machine seven years ago, and has persistently and constantly labored since to develop it, until now it does its work as do all labor saving machines, better than by hand, gathers a larger per cent. from the plant, and a cleaver sample, freer from trash and dirt, gathers that which is ripe and only that which is ripe, leaving the blossoms and maripe fruit uninjured to ripen for a later picking doing its work with all the case and certainly that the harvester binds wheat, the mowing machine cuts grass, or the sewing machine makes a seam, and is as simple as either of them. The interests involved are so great that the results of the use of these machines, when reduced to figures, leveliders the brain. It is expected to save \$30,000,000 annually in hurvesting the cutton crop, a sum so great that the mere mention of it tends to create doubt and make it more difficult to raise money to manufacture machines, of which \$0,000 are needed for the next crop; but the doubts are disappearing like the mists before the morning sun. The truth but the doubts are disappearing like the mists before the morning sun. The truth is mighty and will prevail, and the evi-dence that the Lone Star Cotton Picker is a success is direct, positive and incontro-vertible.

a success is unreat, positive and investible.

A full size machine, direct from the cotton field, is now at the office of the Company, 31 Milk St., Bostor, where all are invited to witness its working.

"I tried several different flocturs, but to no avail. I was ao nervous that I couli not sleep, and had to walk the foor to keep from going insane. My heart was in h.d shape, and I was a perfect wreck.

"Now I sleep well nights, have a good appetite, and my heart is all right. This wonderful change is due solely to my use of Paine's celery compound, and I write these words, hoping they will be of benefit to others who are sleepless, or suffering from heart troub e, malaria, or nervous disease. I have not had an attack of malaria since I commenced using the compound, and am now working every day."

Most people already know that Paine a celery compound is no ordinary nervice, sarsaparilla, or bitters. It is the discovery of Prof. Phelps of Dartmouth, and is a scientific discovery that is within the reach of all. It possesses currive and strength-giving qualities of almost mavelous power, imparting energy and vigir to the tired and languid, banishing ach a tand pains, and giving peaceful sleep to the insomniac.

Newbegin, of Boton, completed one of the most interesting and from the schooner Dick Williams, who was drowned Tuesday evening at Ayer's wharf at South Brewer, as was an nounced in yesterday's WBIG, but they met with no success. Under the direction of Capt. Joel Hopkins, the dead man's employer, a large portion of the river bottom was dragged over and all was done that was possible, but no signs of the remains were seen, and after six or seven hours of (work the task was given up as being of no use.
